Art Unit: 2872

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a mirror device comprising a mirror substrate having at least one first and second mirror-side operating regions and a substrate having at least one first and second opposite-side operating sections, wherein the first and second mirror-side operating regions and the first and second opposite-side operating sections are formed so that an attractive force is generated and wherein at least one of the mirror substrate and the support substrate is formed so that a gap between the first mirror-side operating region and the first opposite-side operating sections is narrower than a gap between the second mirror-side operating region and the second opposite-side operating section, classified in class 359, subclass 295.
- II. Claims 11-14, drawn to a method for driving a mirror device comprising a mirror substrate having a mirror which is driven by a predetermined distance-dependent driving force and a support substrate with particular distance-dependent driving force details, classified in class 359, subclass 224.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as an apparatus without a

mirror substrate having at least one first and second mirror-side operating regions and/or a substrate having at least one first and second opposite-side operating sections.

Page 3

- Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricky D. Shafer whose telephone number is (571) 272-2320. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
